Governor Sean Parnell

1. Call to order –Tom Maloney, Treasurer
2. Self Introductions
3. Headtable Introductions
4. Staff Report: Carl Portman, Deputy Director
5. Program and Keynote Speaker:

**From the Tongass to Tok:
A New Decade of Challenges and
Opportunities for Alaska Forestry
Chris Maisch, Alaska State Forester**

Future Meetings:

February 4: *Alaska Alliance for Cruise Travel*, Steve Hites, Skagway Street Car Company, Inc.

February 18: *Economic Impacts of Proposed Cook Inlet Beluga Whale Critical Habitat Designations*, Bill Sheffield, Director, Port of Anchorage, John McClellan, Tyonek Native Corporation, other speakers TBA

March 4: *Economic Benefits of Port MacKenzie Rail Extension to the Mainline*, Rick Mystrom, Former Mayor of Anchorage and Economic Development Advisor to Mat-Su Borough

March 18: *Point Thomson Project*, Speaker TBA

Please add my name to RDC's mailing list

Date: January 20, 2009

NOAA sets public hearings on Cook Inlet beluga proposed habitat

NOAA Fisheries is holding public hearings on proposed critical habitat areas for Cook Inlet beluga whales in Soldotna, Homer, Wasilla and Anchorage, Alaska.

NOAA has also extended the public comment period on a proposal designating critical habitat for the endangered Cook Inlet beluga whales until March 3, 2010. The additional 30 days should allow sufficient time for responders to comment while preserving the time needed for NOAA Fisheries to prepare the final rule.

The Alaska Congressional delegation and others requested an extended comment period after the proposed critical habitat rule was published in the Federal Register on December 2, 2009.

The public hearings will be held at:

Soldotna

February 3, 2010, between 6:00 pm and 9:00 pm at the Kenai Peninsula Borough Assembly Chambers, George A. Navarre Kenai Peninsula Borough Administration Building, 144 N. Binkley Street

Homer

February 4, 2010, between 6:00 pm and 9:00 pm at the Alaska Islands and Ocean Visitor Center, 95 Sterling Highway #1

Wasilla

February 11, 2010, between 6:00 pm and 9:00 pm at the Best Western, Lake Lucille Inn, Iditarod Room, 1300 West Lake Lucille Drive

Anchorage

February 12, 2010, between 6:00 pm and 9:00 pm in the Loussac Public Library, Wilda Marston Room, 3600 Denali Street, Anchorage, AK

Written comments—which should be identified by “RIN 0648-AX50”---may be sent to Kaja Brix, Assistant Regional Administrator, Protected Resources, Alaska Region, NMFS, ATTN: Ellen Sebastian
Electronic submissions: Submit all electronic public comments via the Federal eRulemaking Portal website at <http://www.regulations.gov>.
Mail: P.O. Box 21668, Juneau, AK 99802-1668
Fax: 907-586-7557
Hand deliver to the Federal Building: 709 West 9th Street, Room 420A, Juneau, AK.

More information about Cook Inlet beluga whales can be found at:
alaskafisheries.noaa.gov/protectedresources/whales/beluga.htm

The proposed rule for critical habitat areas is at:
<http://alaskafisheries.noaa.gov/prules/74fr63080.pdf>

NOAA understands and predicts changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and conserves and manages our coastal and marine resources. Visit <http://www.noaa.gov>. To learn more about NOAA Fisheries in Alaska, visit <http://alaskafisheries.noaa.gov> or: www.afsc.noaa.gov

Testimony of Carl Portman
Deputy Director
Resource Development Council
To U.S. Army Corps of Engineers
Scoping Hearing on Point Thomson Draft EIS
January 19, 2010
Anchorage, AK

The Resource Development Council (RDC) appreciates the opportunity to present brief comments on the Point Thomson Project Environmental Impact Statement

RDC is a statewide organization made up of all resource sectors, business associations, labor unions, Native corporations, tourism providers, local governments and individuals. RDC's purpose is to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

RDC strongly supports the advancement of the Point Thomson project, which is essential to the success of the Alaska gas pipeline project – a major clean-energy priority of the Obama administration. Point Thomson contains an important component of gas volume to be moved by an Alaska gas pipeline and accounts for approximately 25 percent of known North Slope gas reserves.

We encourage the Corps in its development of the EIS to fully consider the importance of this project to the proposed gas pipeline, as well as its overall economic benefits to Alaska and the nation. Development of oil and gas resources at Point Thomson and other North Slope fields will help meet domestic energy and reduce dependence on foreign sources. In addition, this multi-billion, phased-approach project will provide hundreds of new jobs, additional tax revenues to local, state and federal governments and clean domestic energy to U.S. markets.

The project is designed to minimize environmental impacts, utilizing existing gravel pads, and access to the site is by ice roads. Moreover, much of Point Thomson's gas resources are offshore, but these resources will be developed from onshore pads, minimizing any potential environmental impact.

With regard to polar bear critical habitat, we encourage the Corps to acknowledge the U.S. Fish and Wildlife Service's findings that (1) the oil industry in Alaska has minimal impact on polar bears, (2) does not pose a threat to the survival or recovery of the species, and (3) is strictly regulated under the Marine Mammal Protection Act.

Moreover, with regard to polar bear denning habitat, it is plentiful, widely distributed and undisturbed on the Beaufort Sea coastal plain. It is highly unlikely that denning habitat will become a limiting factor for polar bears, even when all foreseeable development activity is taken into account. We certainly do not see any significant impact from the Point Thomson project on the various proposed critical habitats for polar bears. However, we raise this issue because it will certainly be used by those interests who do not support oil and gas development in Alaska's arctic, whether it's onshore or offshore.

RDC appreciates the opportunity to express its support for the Point Thomson project and urges the Corps to fully acknowledge the economic benefits of this project, as well as its importance to a successful Alaska gas pipeline project. We also encourage the Corps to acknowledge that this project will not pose a threat to polar bears or its habitat. Thank you.

Corps Kicks Off Point Thomson Project EIS Study

This is the first in a series of four newsletters to update you about a proposed project to further develop the Point Thomson oil and gas field on the Beaufort Sea coast. ExxonMobil has applied for a federal permit from the U.S. Army Corps of Engineers (Corps) to develop and operate additional facilities for this field. In this newsletter are summaries of the project description, the public review process, and ways for you to obtain more information and provide comments.

For the Point Thomson Project, the Corps is the lead federal agency for the Environmental Impact Statement (EIS) development process, and the Environmental Protection Agency, U.S. Fish and Wildlife Service, and State of Alaska Department of Natural Resources are Cooperating Agencies. As the lead agency, the Corps is responsible for overseeing the EIS development process, seeking public input, consulting with other agencies, and ensuring NEPA compliance.

Cooperating agencies have jurisdiction by law, such as the Endangered Species Act, Clean Air Act, or Clean Water Act, or special expertise in regard to any potential environmental impact to be addressed in the project EIS. These agencies' responsibilities include assisting to identify issues of concern, and providing meaningful and timely input throughout the NEPA process.

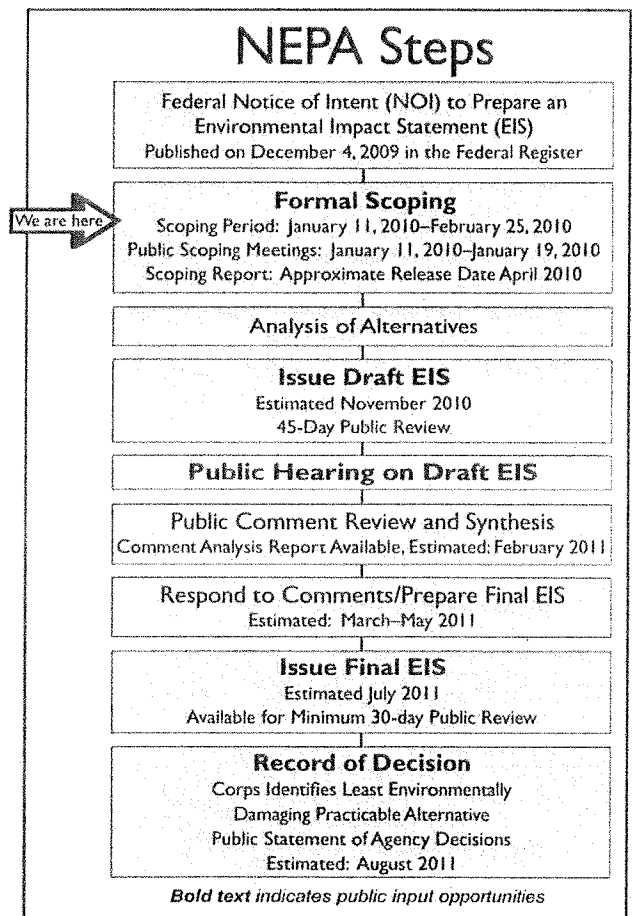

The first formal phase of the EIS process is scoping. The "Formal Scoping" period is dedicated to:

- » identifying potentially interested parties
- » identifying public and agency concerns
- » defining the range of issues that will be examined

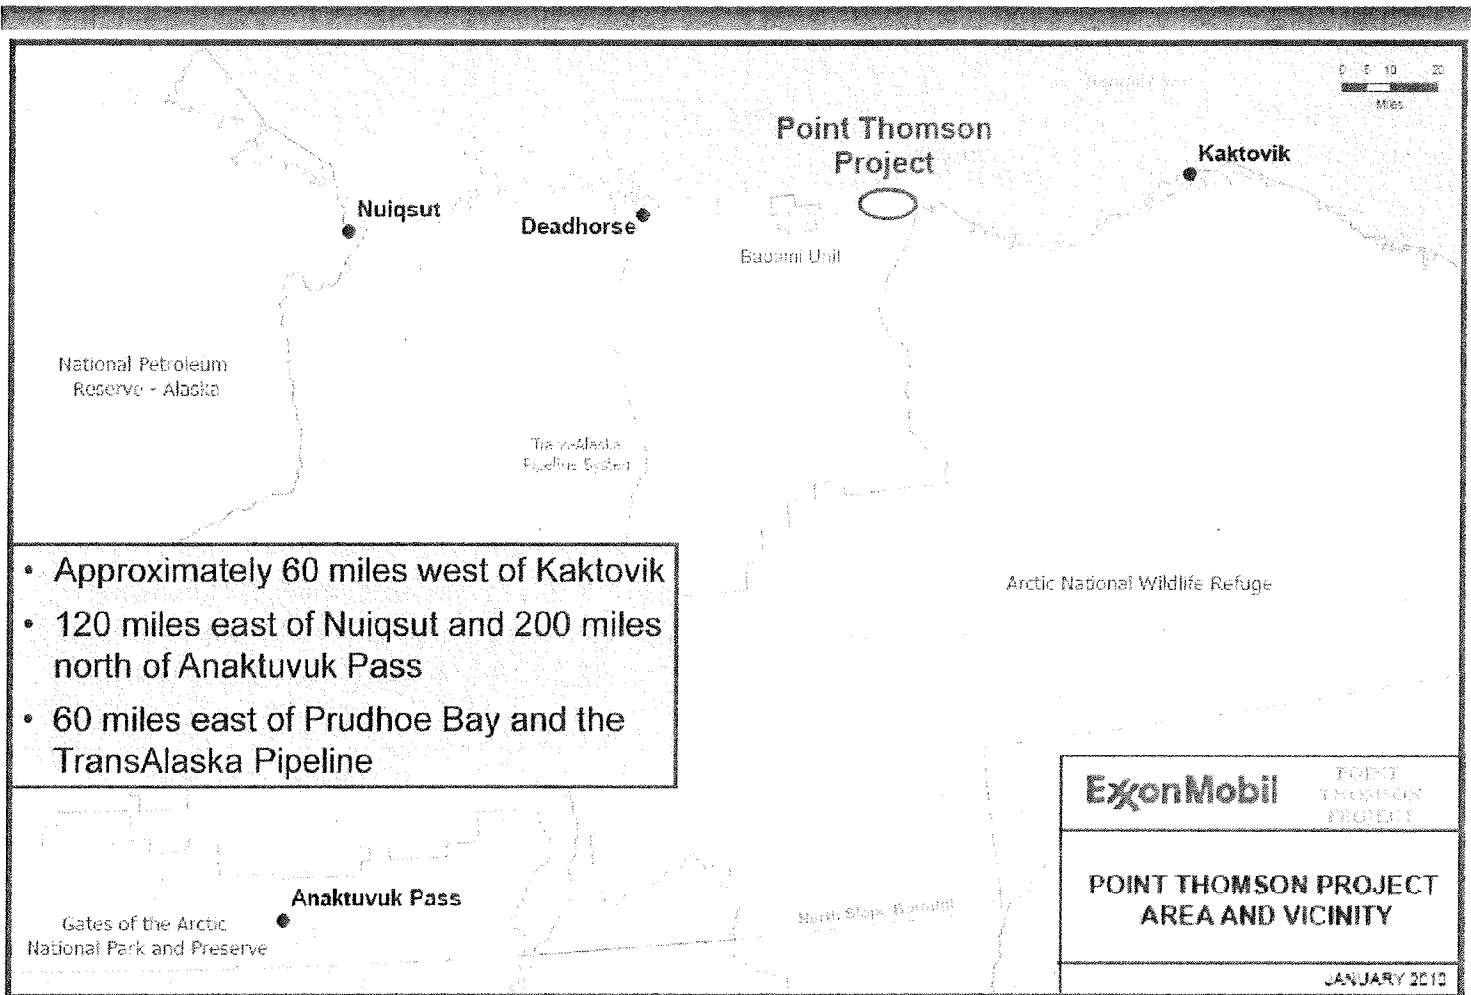

The scoping comment deadline is February 25, 2010.

Public Scoping Meeting Schedule

Fairbanks	Monday, January 11, 2010 ● 5-8 pm Westmark Hotel, 813 Noble St.
Kaktovik	Tuesday, January 12, 2010 ● 4-7 pm Community Hall
Nuiqsut	Wednesday, January 13, 2010 ● 5-8 pm Trapper School
Barrow	Thursday, January 14, 2010 ● 5-8 pm Inupiat Heritage Center
Anchorage	Tuesday, January 19, 2010 ● 5-8 pm Dena'ina Convention Center, 600 W. 7th Ave. (Kahtnu Room I, 2nd floor)

There will be a presentation provided at all the meetings beginning at 6:00 pm (5:00 pm in Kaktovik), followed by questions and answers. Translation and opportunities for formal comments will be provided in Inupiaq in Kaktovik, Nuiqsut, and Barrow.

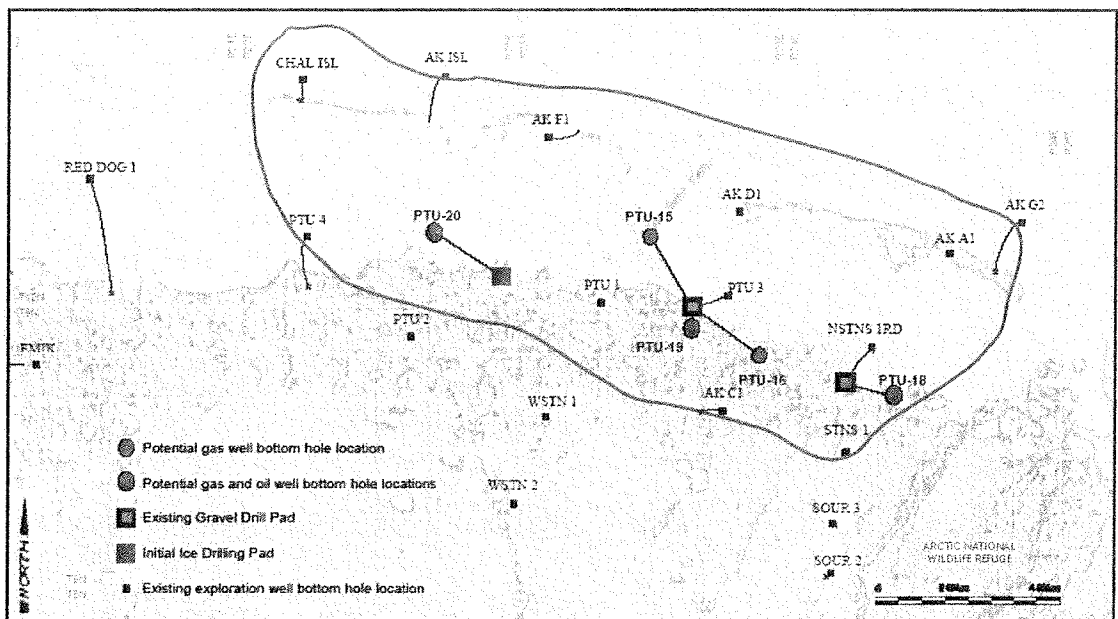

Project Description

Exxon Mobil Corporation (ExxonMobil) has applied for a federal permit to develop the Thomson Sand Reservoir by 2014. ExxonMobil would recover liquid condensate from natural gas and re-inject the residual gas back into the reservoir, conserving it for future use. ExxonMobil proposes to develop offshore portions of the reservoir using long-reach directional drilling techniques from onshore pads.

The produced hydrocarbon liquids (condensate, and possibly oil) would be shipped through a new 22-mile long, elevated pipeline from Point Thomson to the existing Badami Development (see Gas Cycling diagram on page 3). This pipe-

line would then tie into the existing Badami pipeline, which connects with the existing oil pipeline system to the Trans-Alaska Pipeline System Pump Station No. 1. Initial average production of condensate is expected to

Onshore drilling rigs will pump offshore oil and gas. NOTE: Red line is the approximate boundary of the Thomson Sand Reservoir.

be approximately 10,000 barrels per day (bpd), and possibly up to 10,000 bpd of oil.

The project includes construction and operation of a minimum of five wells drilled from three pads. (Authorized drilling of two production wells is already underway from the existing Central Pad.) Other proposed facilities include a gravel airstrip, cargo dock facility, in-field gravel roads, ice roads, in-field pipelines, and a gravel mine. Dredging for the dock may be required.

Benefits

This project will provide economic benefits to the State of Alaska, North Slope Borough (NSB), and local communities through the creation of new jobs and tax revenues. New jobs will include both temporary jobs during drilling, engineering, procurement, and construction, and long-term jobs supporting permanent operations. New revenue for the State of Alaska and the NSB will help offset declining revenue from existing hydrocarbon production and facilities.

2009 – 2010 Approximate Drilling Timeline* and Gas Cycling

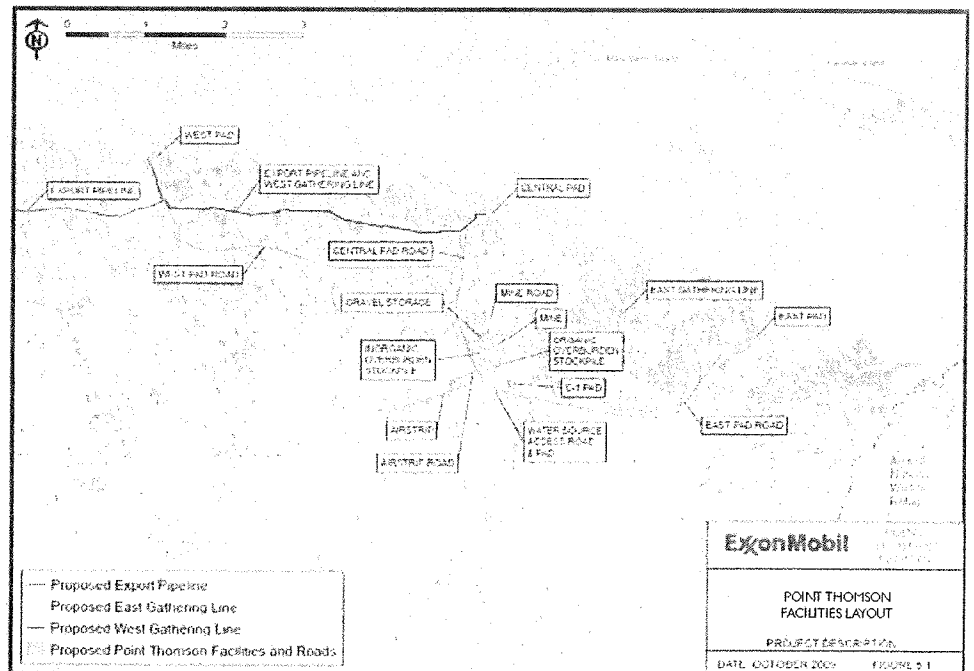

*Seasonal drilling restrictions will be applied.

Point Thomson is the largest discovered, undeveloped natural gas field in Alaska. If a gas pipeline is built, natural gas from Point Thomson would be an important energy source for the U.S. and Alaska.

The facilities layout below shows the various elements of the proposed project, in addition to how the pads will be connected to each other.

Project Purpose and Need

According to ExxonMobil, the development of this resource will help the U.S. meet domestic energy demand and reduce dependence on foreign sources of oil. Production at Point Thomson will help offset declining production from Alaska's North Slope reservoirs, and will help to maintain the efficiency of the Trans-Alaska Pipeline System.

Press Release
FOR IMMEDIATE RELEASE
January 15, 2010

ATTORNEY GENERAL'S OFFICE

State Granted Intervention in Off-Shore Drilling Litigation

Anchorage, Alaska – The State of Alaska has been granted the right to intervene in a case in the Ninth Circuit Court of Appeals concerning plans by Shell to proceed with exploration for oil in the Beaufort Sea.

Several environmental groups are challenging the decision by the Minerals Management Service to allow development of the Outer Continental Shelf. But the state contends that the federal agency adequately considered the impacts of oil drilling on the Arctic ecosystem and on subsistence activities.

“The state’s intervention is critical because no other party will vigorously represent our interests,” said Attorney General Dan Sullivan. “This is part and parcel of the administration’s commitment to foster resource development and promote job growth.”

The Outer Continental Shelf contains an estimated 27 billion barrels of recoverable oil and an estimated 130 trillion cubic feet of recoverable natural gas, “making it of critical importance not just to the Alaska economy but also to America’s energy security,” the attorney general said.

He noted that Shell’s exploration plan includes extensive mitigation measures intended to protect whales, subsistence and the environment.

ACT NOW!

ALASKA ACT
Alaska Alliance for Cruise Travel

Dear Alaska Business Partner:

With the decision from the cruise industry to move portions of their fleet and their marketing dollars out of Alaska, we now must look ahead with creative minds to keep our Alaska tourism businesses viable. We believe we cannot sit back and wait for the Alaska Legislature, Governor's office, or anyone other than ourselves to affect change that will bring our industry back to life. **PLEASE PASS THIS TO ALL OF YOUR EMPLOYEES!**

To advance our goals, we are developing a new support group called the Alaska Alliance for Cruise Travel (AlaskaACT) We are not the cruise lines, rather we are a group of local Alaska businesses.

Our Mission Statement is simple:

Alaska Alliance for Cruise Travel is an Alaskan statewide, non-profit, membership-funded organization made up of business and individuals benefiting from cruise travel. Through AlaskaACT, these stakeholders will work together to promote accurate information and support responsible development and growth of Alaska Tourism and the Cruise Industry.

In addition to these activities our organization's efforts are focusing on the following goals:

- Create a positive business environment in Alaska for the cruise and tourism industries
- Encourage the Alaska Legislature and Administration to work toward a resolution of the current legal issues between the State and the cruise industry
- Oppose inequitable taxation directed at the cruise industry
- Support equitable environmental laws for the cruise industry
- Commit its resources to advancing the restoration and stability of the Cruise Industry *in the best interest of Alaska, and Alaskans.*
- Encourage accurate and honest reporting by the media
- Educate Alaskans about the economic benefits and positive environmental effects of the cruise industry on Alaska
- Support the cruise industry in their efforts to protect and preserve the environment through reasonable and attainable legislation

Please sign up today at www.alaskaact.com

(You will receive an email that will ask you to confirm your registration.)

FOR IMMEDIATE RELEASE:

**NOTED IRISH FILMMAKERS WILL DISCUSS “NOT EVIL JUST WRONG,” THEIR
CLIMATE CHANGE DOCUMENTARY**

Anchorage, Alaska – Irish Filmmakers Ann McElhinney and Phelim McAleer will be at the Wendy Williamson Auditorium on the University of Alaska Anchorage campus, January 26, to present their new film to Alaska audiences. The documentary describes the politics behind the fears of climate change and suggests that those who think they are saving the planet from climate change are only hurting the poor.

The film, which will be shown before the panel discussion, includes an analysis of Al Gore’s climate change documentary and compares it with the scientific data used to justify the ban of DDT. After the worldwide DDT ban, the number of deaths in Africa from malaria skyrocketed. The makers of “Not Evil, Just Wrong” believe congressional proposals being considered today will similarly have unintended humanitarian consequences.

Also discussed in the film is the assertion that the hottest years in the United States were 1998 and 2006, and the infamous "hockey stick" graph that attributed a supposedly unique burst of warming in the 20th century to humans.

“The moral questions surrounding climate change have not, until now, been addressed,” said Jeremy Thompson, executive director of the Alaska Policy Forum, which is cosponsoring the event with the UAA College Republicans. “The objections raised against the regime of climate change science aren’t merely economic. There are clear humanitarian reasons for opposing these ideas.”

The film will be shown at 7:00 pm. Tickets are \$5 for students and \$8 for general public, and can be purchased at the Alaska Policy Forum offices or at the UAA Campus Student Union Building. For more information, call the Alaska Policy Forum at 907.334.5853 or email jthompson@alaskapolicyforum.org.

ANILCA Seminar
March 2 & 3, 2010
Embassy Suites
600 E. Benson Blvd., Anchorage

*Anyone who wants to understand Alaska and its future
must understand ANILCA...
the Alaska National Interest Lands Conservation Act of 1980*

\$500 cost includes comprehensive ANILCA Study Guide and CD, lunches, continental breakfasts and lively discussion with guest speakers

- 8:30 am – 4:30 pm
- 25 participants minimum
- special hotel rates available

Contact: (907) 771-2443 or nhemsath@institutenorth.org

If you can't make this seminar, please contact us about other opportunities.

Participants will gain an understanding of:

- Alaska's land history (especially Statehood and ANCSA) and ANILCA
- The key provisions of ANILCA
- Ten exceptions written by Congress in ANILCA to guarantee the continuation of the Alaska lifestyle
- The intent of Congress, including the "no more" clause
- Subsistence – ANILCA provisions and how it is managed today
- General hunting, fishing and trapping on federal lands
- Access to inholdings and across Wilderness Preserves in National Forests, Parks, Refuges and other Conservation System Units and the definition of "compatible with the purposes of a CSU"
- Navigable waters, submerged lands and RS2477s – who owns them and what is their status?
- Wilderness Act exceptions in ANILCA
- ANWR and ANILCA
- Management planning and ANILCA
- ANILCA and the State of Alaska

Presented by the **Institute of the North**
509 West Third Avenue, Suite 107
Anchorage, Alaska 99501

PLEASE FILL OUT THE ATTACHED ASSESSMENT

ASSESSMENT OF THE LEVEL OF YOUR ANILCA BACKGROUND AND YOUR AREAS OF INTEREST

This seminar was prepared for both those who know very little about ANILCA and those who work with its provisions on a regular basis. The following feedback will help us prepare for your participation.

- I know very little about ANILCA and would like a general introduction to its history, its key concepts and the influence it has on major Alaska issues.
- I know quite a bit about ANILCA but want to learn more.
- I work with ANILCA issues regularly but need a deeper understanding of many of its provisions.

Specifically, I am interested in the following ANILCA related issues:

- All of the issues listed below
- The Alaska context – our history and visions
- The battle for statehood, the Compact, and building an economy on the “commons”
- The struggle leading to the passage of ANILCA, the mobilization of national conservation interests and the intent of Congress when the bill passed
- The geographic context of the Conservation System Units
- Management principles for the Conservation System Units (parks, etc.) in Alaska – revising management plans and the step-down planning process
- Alaska exceptions written by Congress to enable the continuation of the Alaska way of life and a healthy economy
- Access across Conservation System Units and to inholdings; the definition of "compatible with the purposes of a conservation unit" as it relates to access
- Wilderness reviews and exceptions to the Wilderness Act in Alaska
- Subsistence, including definitions of rural priority, customary trade and management
- General hunting and fishing in National Parks and on other federal lands
- The Arctic National Wildlife Refuge and the debate over the 1002 area
- How ANILCA interfaces with the Alaska Native Claims Settlement Act – access, 17(b) easements, Native allotments, etc.
- Who owns what, including navigable waters, submerged lands and valid existing rights including RS2477 rights-of-way
- Recordable Disclaimers of Interest

Thank you. See you in March!
