Growing Alaska Through Responsible Resource Development

Where does the United States
get most of its energy?

- a. Africa
- b. The Middle East
- c. The U.S.

c. The U.S.

New technologies have unlocked abundant resources
right here at home. **Energy lives here™.**

Take the energy quiz: exxonmobil.com/quiz

Irwin Chou
Production Engineer
BP Alaska

Our Commitment to Alaska: More Investment. More Jobs.

Thanks to a more competitive economic climate, we are adding two more rigs to our drilling fleet and will drill dozens of new oil wells on the North Slope. That means more investment. More production. And more jobs for Alaskans. It's an exciting time for BP and Alaska.

Find out more about BP Alaska at alaska.bp.com

Proud Sponsor of the 35th Annual RDC Conference

While the name is TransCanada, we're truly North American, with a significant presence in the United States.

Our natural gas network taps into virtually every major gas supply basin on the continent. Each day, we deliver approximately 20% of the natural gas consumed in North America. And we're North America's third largest natural gas storage operator with 400 Bcf of capacity.

We are more than 1,800 employees in 33 states. And approximately 5,500 employees in the United States, Canada and Mexico who are proud of the role we play in meeting millions of North Americans energy needs, every day. We are TransCanada.

What's Up? Dock.

The big news around here – ASRC Energy Services Marine Support is now providing marine services in Cook Inlet. Our newly refurbished Rig Tenders Marine Terminal is fully equipped to deliver a wide range of specialized services to the Kenai Peninsula's oil and gas industry. In Alaska, only one company puts it all together – AES.
